Testes unitários e TDD com PHP e PHPUnit

# Karen Kvam

Back-end (PHP/Laravel) | Serverless AWS (Lambda) | PostgreSQL | Docker | Terraform  
São Paulo, São Paulo, Brazil

## Summary

Developer with expertise in object-oriented programming in PHP, Flutter, Python, HTML, CSS, and JavaScript, as well as relational databases, data structures, and algorithms. Familiar with the Laravel and Zend frameworks in PHP and experienced with version control using Git. Skilled in problem-solving and code debugging.

## Experience

1Doc  
Software Developer  
October 2025 - Present (4 months)

AKIPOSSO+  
Fullstack Software  
June 2024 - September 2025 (1 year 4 months)  
São Paulo, Brazil

Delivering end-to-end solutions with a focus on scalability, performance, and clean code — from backend logic to user interfaces and infrastructure automation.

My responsibilities include:

Designing and structuring relational databases for new features and products;

Building serverless APIs on AWS Lambda using PHP;

Developing responsive and functional UIs with Flutter;

Supporting DevOps tasks such as automating infrastructure with Terraform and managing cloud environments;

Participating in technical decisions and contributing to the continuous integration of services.

Bringing together development and DevOps expertise to build robust and efficient systems that support the platform's long-term growth.

**Times Idiomas**

**Full Stack Developer**

June 2023 - June 2024 (1 year 1 month)

Campinas, São Paulo, Brazil

Developed features for systems and APIs using PHP and Flutter apps to enhance and scale internal solutions.

Debugged and improved application performance and stability by identifying and resolving issues.

Optimized database tables for better storage and retrieval efficiency.

Participated in code refactoring to increase maintainability, readability, and scalability.

Led test suite implementation in Flutter to ensure software quality and integrity.

Skills: PHP, Flutter, Git, Laravel, MySQL, Docker, Zoho

**Hello Soluções**

**Software Developer**

January 2023 - April 2023 (4 months)

Handled a wide range of tasks including bug fixing and feature implementation using technologies like PHP, Laravel, jQuery, Docker, and MySQL.

Solved complex issues, improved system processes, and ensured delivery of client-focused solutions.

Skills: PHP, Laravel, JavaScript, HTML, CSS, jQuery, Git, Docker

**Letec Solutions**

**Software Developer**

June 2022 - December 2022 (7 months)

Letec Solutions · Full-time | Jun 2022 – Dec 2022

Maintained and expanded backend systems using PHP and CodeIgniter.

Contributed to frontend tasks with HTML, JavaScript, and jQuery.

Maintained and customized WordPress-based systems.

Skills: PHP, CodeIgniter, JavaScript, jQuery, AJAX, WordPress, Bootstrap

### Imovel Guide

#### Software Developer Intern

March 2022 - April 2022 (2 months)

São Paulo, Brazil

Supported backend development using PHP and Laravel, focusing on system maintenance and new feature implementation.

Skills: PHP, Laravel, Git, JavaScript, jQuery
